

# Arcus

Design by Martin Ballendat

The Arcus collection just got an upgrade. We've added four new conference models, all featuring Arcus' signature curved backrest – a unique design element that also makes handling easy. All options come in sleek light grey or black colours, and, aside from the five-arm cross model, are stackable for practical storage.

Plus, the Arcus task chair now has an updated mechanism for smoother movement. Get the comfort and support that work as hard as you do.
